LS Forecourt

Fuel your margins with a one-stop gas station software solution

LS Forecourt
The fully integrated management software for gas stations, powered by Microsoft Dynamics.

Run a successful forecourt business — from the pumps, to the gas station, to the back office — with just one powerful, flexible solution. The system instantly replicates all information across the organization, so that you can always take informed business decisions based on up-to-date sales figures.

LS Forecourt includes:

- Extensive pump control from POS
- Station management
- Fuel POS with fuel sales
- Wet stock management
- Retail and hospitality tools

LS Forecourt will help you:

- Complete all your sales, fuel and other items, from a single POS

- Improve operational efficiency by managing your whole value chain from HQ

- Cut IT costs by using just one application for all forecourt operations

- Manage prices flexibly to increase your competitiveness

- Pin-point your business's strengths and weaknesses with the powerful BI reports

- Manage your c-store and restaurant

Superior service
Empower your staff and
offer great customer service

Equip your staff with powerful selling tools, gain efficiency and make your customers happy and loyal. Offer top-notch customer service with:

- Completion of all transactions, including fuel and other items, at the POS

- Faster service, as all staff uses the same, intuitive graphic interface across the whole organization

- Customer rewards across the channels with in-store, online and mobile loyalty schemes and offers

- Multiple fuel sale methods: LS Forecourt supports pre-pay at the pump, post-pay and preset

Immediacy & efficiency
Control your whole operation
from central office

The system's powerful modules will provide you with:

- Real-time overview on POS terminals, store systems, inventory and merchandising

- Ability to schedule automated price changes from headquarters, forcing prices into effect

- Central control over your whole operation, from pumps to foodservice to c-store

- In-depth analyses of sales and performance with a host of reports and Business Intelligence

Total overview of stock and production
Manage your inventory effectively

Gain a holistic view of your inventory processes with LS First Forecourt. View wet stock management data including fuel sales, gauge readings, pump totals and deliveries to manage your stock precisely. Track inventory transactions and production costs, and match orders to deliveries at head office. Maximize fuel margins and determine the optimal pricing. The system includes tools for automatic replenishment of wet stock based on sales history or stock levels.

Available on-premises, in the cloud and as a hybrid solution
Select your model

Choose the model that best suits your business needs and your budget: several setup and deployment options are available.

LS Forecourt is available as:

Point of Sale and back office solution
Do you already have an ERP system, and need a powerful, flexible and easily integrated POS solution? LS Forecourt is available as a front- and back-office solution, which can easily be integrated to your existing ERP.

On-premises complete forecourt solution (POS+ERP)
The system – including front-office, back-office tools and Microsoft Dynamics ERP – can be fully deployed on-premises. LS Forecourt is available on Microsoft Dynamics NAV or AX.

Cloud-based complete forecourt solution (POS+ERP)
LS Forecourt is available as Software as a Service (SaaS) on Microsoft Dynamics 365.
The system can also be deployed in a private or public cloud, or in a hybrid setup.
